Patent and Trademark Libraries

Patent and Trademark Depository Libraries (PTDLs) receive patent and trademark information from the U.S. Patent and Trademark Office. Many PTDLs have on file all full-text patents issued since 1790, trademarks published since 1872, and select collections of foreign patents. All PTDLs have both the patent and trademark sections of the *Official Gazette*. Utility and design patents are distributed numerically on 16mm microfilm, plant patents on color microfiche. Patent and trademark search systems are on CD-ROM. All information is available for use by the public free of charge.

In addition, each PTDL offers reference publications which outline and provide access to the patent and trademark classification systems, as well as other documents and publications which supplement the basic search tools. PTDLs provide technical staff assistance in using all materials. Facilities for making paper copies of patent and trademark information are generally provided for a fee.

A list of PTDLs is available from the U.S. Patent and Trademark Office at the address listed above.
